

ENGINEERING CAPABILITIES STATEMENT

CAGE- 8VNH1
DUNS- 117879848

COMPANY DATA

Time For Change, LLC.

DUNS: 117879848

CAGE: 8VNH1

SET ASIDES: WOSB, WBE, HUB

CONTACT: Cassandra K. Moody, P.E.

EMAIL: Cassandra@TimeForChangeEngineer.com

PHONE: 832.850.4104

NAICS AND PSC CODES:

- 541330- Engineering consulting services
- R425- Technical engineering support
- AT5- Pipeline safety transportation R&D
- R410 + R408- Program evaluation, review, development, management support
- U004- Technical training and education
- B505- Cost benefit study and analysis
- R424- Expert witness

CORE COMPETENCIES

Time For Change, LLC. (TFC) is a Houston, TX based engineering consultancy committed to engineering visionary change for our clients since 2019.

TFC provides the following **engineering consulting services** to energy companies:

- mechanical pipeline and asset integrity engineering,
- continuous improvement vision, and
- technical transformation leadership.

Our unique, safe, and risk-informed optimization of ROI: Return on *INTEGRITY* sets us apart from other providers as your partner to achieve pipeline integrity project success as well as Environmental, Sustainability, and Governance (ESG) net-zero targets.

We have a special passion to encourage next-generation and professional women in technical industries through **professional coaching services** and planner **products**.

DIFFERENTIATORS

Having led pipeline failure investigations—most of which were *preventable*—involving loss of life and environmental damage, we have been striving to protect people and the environment existing around energy assets for nearly 15 years by:

- ensuring regulatory compliance and asset longevity all while safeguarding favorable ROI.
- applying lessons learned from the pipeline safety management system (SMS) governance to sustainability during the fossil fuel transition.
- drawing on traditional oil & gas and renewable energy experience to passionately engineer risk-informed solutions and drive technological innovation to the ever-changing and complex challenges of today's world.
- the ability to nimbly jump in, with a conviction for integrity, on a variety of projects to reengineer energy as it's known today.

PAST PERFORMANCE

Client: Major North American pipeline operator

Objective: Combine and improve 300+ legacy operating procedures into a unified set of 120 procedures, on time and under budget.

Approach: Through concise communication and visionary leadership, we aligned 65 key stakeholders across US and Canada to work towards net zero emissions by 2050 and their continuous improvement goal of zero incidents.

Reference: "Cassandra was professional, very responsive, and positive/courteous to engage with (even when she and her team were *extremely* working longer hours to meet delivery dates)"

-Manager, Asset Integrity
