

# SAFEGUARDING ROI: Return on INTEGRITY

We understand your company's objective to transport energy safely, reliably, and profitably. But, as a former pipeline operator, we also know the time required to ensure compliance while getting your work done. We engineer risk-informed solutions to help operators safely optimize their ROI: Return On INTEGRITY.

## Engineering solutions

We transform our customers from a risky operation with unknowns to assured asset integrity confidence that is economic through our proven ADD Method: Assess, Design, Do.

## ... differently

Our conviction for integrity- *both pipeline and personal*-sets us apart.

With proven expertise, we deliver results.

### Integrity Management

*We stay current with the regulations and standards so you don't have to.*

### Optimizations

*Leverage industry learnings and best practices to save time and money.*

### Expert Witness

*Protect yourself with a strong defense and proven expertise.*
